Presented by:
Jordan Landis, Karen Keener,
Ryan McClenathan and
Luke Rogers of
Crestview Local Schools

Professional Learning Description:

Teachers often ask what universal design for learning looks like. To truly understand UDL, one must understand the “thought bubbles” teachers have as they intentionally plan instruction to reduce barriers and “hear” the instruction from both the teacher and student perspectives. This session will utilize video clips, instructional materials, and discussion to demonstrate the planning and implementation of instruction designed via UDL. As co-teachers, the presenters will discuss how the Specially Designed Instruction from students’ IEPs are embedded in the general education classroom.

Learning Objectives:

Attendees will learn skills in order to:

1. Have a better understanding of the levels of supports for students
2. Utilize a variety of instructional strategies.
3. Intentionally plan instruction to reduce barriers
4. Set up a classroom utilizing UDL guidelines.

3 contact hours available upon completion

* Please contact Vicki Barbaro at 440-324-5777 ext. 1107 or barbaro@sstr2.org if you require assistance with registering.
